

Project Guide

Innovative design. Integrated systems. Enduring finish.

For over 30 years we have been designing and testing innovative plaster cladding, and coating systems for New Zealand's unique conditions.

Driven to create surfaces that make a living environment feel good to live in, we believe the tactile nature of plaster cladding is unrivaled. The inherently human finish exudes a warmth and quality that can only be created by something crafted by skilled hands.

Refining this quality has taken us on an inspiring product development journey. Our integrated materials —including the iconic Rockcote products — work together to create a diverse range of finishes. All so you can enjoy a natural, timeless surface quality in your home.

The construction process contains many facets which when combined, and applied accurately make for

a shining, and durable example of the construction process, from Design and Architecture, through to the selection of products, and the trades people that apply their skills to the installation of these components.

At Resene Construction Systems we only promote the best products, solutions and practice for each and every solution we provide. With this in mind, we have created this guide to assist you through the construction process.

If you have any questions relating to Resene Construction Systems products, or systems, feel free to contact us direct by free calling 0800 50 70 40.

Designed, Tested & Manufactured in New Zealand

Our systems have been designed for New Zealand conditions and rigorously tested here to withstand our unique climate and protect your investment. We purchase raw materials and manufacture locally at our own facilities to support New Zealand.

Performance Guaranteed

A complete process that includes our exclusive OnSite technical assistance and documentation that helps to ensure your Resene Construction Systems products & systems exceed the requirements of the New Zealand Building Code.

Consistent with Resene Colours

Our premium mineral or coloured plaster finish ranges are tinted with 'Genuine' Resene colourants to your selected colour, these plaster finishes are overcoated with 'Environmental Choice' accredited Resene paint finishes which give you an easy clean, and durable surface you can trust

The Total System

1. System Selection

We have a comprehensive range of plaster facade systems to suit any project. Each system has their own individual benefits that will perform and provide comfort and protection to your project.

2. Specification

We supply complete systems to your project so that you can have a head-ache free experience as your build ticks all the boxes. This is a critical stage that enables all the individual trades people involved to be all on the same page.

3. Quoting

Your project will be quoted by an LBP registered plastering professional. Alternatively, our sales and technical team can assist you in finding someone else to quote you based on your construction schedule.

4. OnSite

Making sure that every step of your project is executed with confidence with our OnSite assistance. This guarantees that everything is completed accurately, saving time and money.

5. Texture Style

The Resene Construction Systems range of textures is comprised of pre-coloured and cement based finishes, all applied by hand. As there are many texture styles to choose from, it is important that the texture you choose complements your design and personal tastes.

6. Colour Selection

Colouring your project not only takes your project to the next level but gives it an essential layer of durable coating. Our Resene ColorShops can help you find your perfect genuine Resene colour to complement your style.

System Selection

①—②—③—④—⑤—⑥

Resene Construction Systems have developed comprehensive, hand applied, rendered cladding solutions for New Zealand.

All Resene Construction Systems cladding systems are supplied and installed by LBP registered Resene Construction Systems plasterers who are qualified and licensed to apply our products.

Each Resene Construction Systems system has different requirements in terms of application and installation from our 'DRYZONE' cavity based cladding systems through to rendering solutions over brick or masonry substrates.

All Resene Construction Systems systems include supply and installation right through to the finished texture style, colour.

Up to 6 hand applied layers, which is twice as many as some of our competitors.

All backed up by a range of products and services that will enhance the system for the life of the building.

Specification

①—②—③—④—⑤—⑥

The specifications of your project are critical, as they provide clear guidance as to what is required by the individual trades people who work on the project.

Many factors make up the specification all of which when combined accurately during the construction stages will make for a shining example of craftsmanship, and ultimately durability for the life of the structure.

Your Architectural or Design professional will specify one our systems that is best suited for your project.

Our premium Rockcote & Plaster Systems range of plasters and facade systems are rigorously tested to comply with the New Zealand Building Code.

A lot of time is spent before construction starts getting all the detailing right for your project — numerous meetings that fine tune the original concept to get the best result.

Quoting

①—②—③—④—⑤—⑥

To assist you in selecting a registered Resene Construction Systems plasterer, contact us on 0800 50 70 40 we will provide you with a list of registered Resene Construction Systems plasterers.

The sales team at Resene Construction Systems will be able to advise you on who is available and best suited to provide a quote based on your building schedule. Alternatively, you may contact one of our many Plastering Professionals direct.

Your project is then quoted by your selected registered Resene Construction Systems plasterer according to the System specifications.

When you decide to proceed sign the acceptance section of the quotation and return it to your registered Resene Construction Systems plasterer for confirmation, which will allow accurate timing of your project into your plastering contractors schedule.

OnSite

①—②—③—④—⑤—⑥

We are the only company with complete back up & support through our exclusive OnSite Quality Assurance to each and every project nationally.

The Resene Construction Systems Performance Guarantee provides for our exclusive OnSite Quality Assurance by our National Sales & Technical team.

Our OnSite Quality Assurance programme is the premium onsite technical assurance available in the industry.

Our site reviews are mandatory and include up to 45 checks during the review of the substrate installation and flashings also final review on completion of the works.

Your professional plastering contractor will undertake the specified cladding installation and plaster finishing in accordance with the specifications and on completion will provide their completed warranty, and Licensed Building Practitioner (LBP) documentation.

Texture Style

The Resene Construction Systems range of textures is wide and varied and are comprised of organic, pre-coloured and natural mineral based finishes, all applied by hand.

Our pre-coloured range of texture finishes are organic, 100% acrylic and can be tinted to your selected colour, these textures are overcoated with 'Environmental Choice' accredited Resene X200, Lumbersider or Aquashield which assists in providing an easy to maintain surface.

Our natural 'mineral' texture finishes are all finished with our full three coat Resene Paint System in your selected colour. Our paint finish choices as with our premium pre-coloured range includes Resene X200, Resene Lumbersider or Resene Aquashield.

We have many texture styles to choose from, it is important that the texture you choose complements your design and personal tastes.

We have sample boxes available of our entire texture range which will assist you in the look and feel of the finishes available.

Check your quote to see what texture style was quoted for.

In most cases Rockcote 'Classico' Pre-coloured texture, or Fast Float Tasman or Ezytex mineral texture finishes are allowed for as they are the most popular.

A range of textures available:

Colour Selection

As a Resene Group company, colour selection is as easy as going to your nearest Resene ColorShop to choose your colours.

Colour selection is an important aspect as it not only enhances your design, it also assists in the on-going durability of the final coatings.

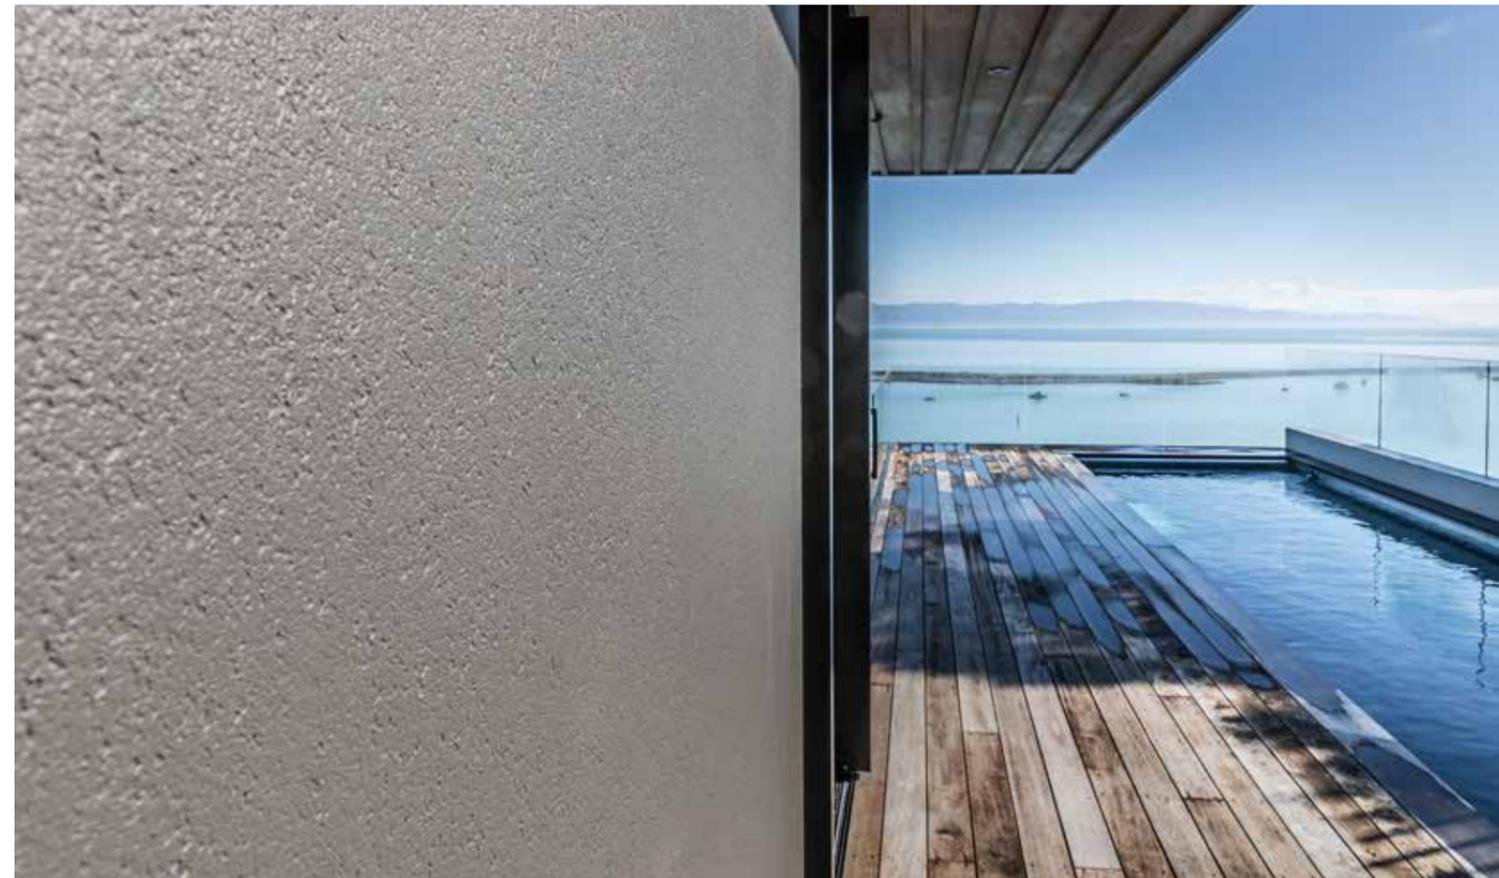

Once you have selected your colour(s) advise your plasterer who in turn will advise Resene Construction Systems. If requested we can supply samples of your selected colour and texture style for your approval.

Dark Colours — yes we do. Our premium CoolPlast & Resene Cool Colour System is the original system to achieve very dark colours over our plaster cladding systems.

Let your contractor know prior to starting works that you are wishing to choose a dark colour as this technology adds cost and advanced ordering of products may apply.

Dark colour selection is not available for use over fibre cement sheet substrates.

Each colour's RV (reflective value) can be found on the Resene's colour chart, or alternatively simply ask a Resene Construction Systems representative.

The Resene Construction Systems Performance Guarantee

Providing you with the assurance that your Resene Construction Systems plaster façade is backed up by one of New Zealand's largest privately owned companies — Resene Paints Ltd.

YOUR RESENE CONSTRUCTION SYSTEMS WARRANTY PACKAGE INCLUDES:

- + Resene Construction Systems Performance Guarantee
- + Resene Construction Systems Registered Plasterer Workmanship Warranty
- + Resene Construction Systems Registered Plasterer Producer Statement
- + LBP memorandum of work
- + Maintenance programme

Performance Guarantee is a complete process that includes our exclusive OnSite assistance, and documentation that helps to ensure your Resene Construction Systems façade exceeds the requirements of the New Zealand Building Code. Our Performance guarantee is valid for the specified term of the selected Resene Construction System and is a Guarantee for the products applied to the project, in turn it stays with the property.

Your project will be given a unique Resene Construction Systems project code, which will identify your project throughout the installation and warranty process. On completion of your contract you will receive the above documents, which should be kept with other important construction records. The Resene Construction Systems Performance Guarantee covers all Resene Construction Systems products as per the approved specification that have been installed to your project.

Being pro-active is the key to maintaining your Resene Construction Systems exterior cladding system.

To assist in this process we provide a comprehensive maintenance programme to assist you in keeping your property looking great.

Our national team of representatives, and LBP registered contractors are also available to assist you.

Breathe life into
your build.

Our Products

ROCKCOTE®

Premium plaster facade systems, pre-coloured, flexible acrylic and mineral coatings for interior and exterior use.

Plaster Systems.

Mineral plasters, and textures for exterior and interior use.

ARTISAN

NATURAL MATERIALS
BY ROCKCOTE

Bespoke range of natural plasters that enhance and define interior and exterior environments.

NTEGRA

LIGHTWEIGHT CONCRETE SYSTEMS

Premium lightweight AAC concrete facade, intertenancy walling, flooring, and fencing systems. Providing impact, and acoustic resistance with the durability of lightweight concrete.

Seismolock GRC

Reinforced plaster strengthening system offering an economical alternative to traditional post construction earthquake strengthening methods.

Ultra high density, extruded styrene, 'outsulation' system for a complete thermal envelope. Timber / steel & masonry structures.

Ezyplast

INTERIOR HARDWALLED PLASTER

Gypsum-based interior hardwall plaster hand applied over concrete blocks, masonry, bricks, metal lathe or plaster board.

graphex.

A graphite infused insulation panel specially designed to significantly improve external insulation of your project.

MULTI STOP

PATCH, REPAIR & FINISH

A range of patching, repairing and finishing plasters for masonry substrates.

DURATHERM

Insulated foundation system. Pre-coated, profiled extruded styrene for insulation to the perimeter of foundations and slab edges.

Multiplast

Fibre cement sheet jointing system, and repair plaster.
