

Concrete Effects Range

Industrial glamour

Natural Materials when combined with our advanced product development and skilled artisan plasterers make for a bold, bespoke statement to any project.

Our range of hand applied concrete effects includes subtle polished

surfaces that replicate pre-cast concrete through to rustic off-form concrete effects such as our 'planked' effect.

Most commonly this finish is achieved with either our MultiStop or Rockcote Otsumigaki materials Multi-Stop is a natural cement grey, whereas Rockcote Otsumigaki can be coloured to achieved the desired colour. The finishes can be applied to various thicknesses and degrees of polish to achieve the bespoke look you require.

If you like a more industrial off form concrete effect our 'planking' effect is a bold textured surface that can be left natural or painted to complement other surfaces in the room. 'Planking' is most frequently completed with our MultiStop plaster.

Both our MultiStop and Rockcote Otsumigaki are natural mineral coatings that breathe and can be used on a wide variety of wall surfaces, including modern plasterboard and concrete for stunning results.

For best results, application by skilled and creative Rockcote Artisan plasterers is highly recommended.

Private residence,
