

Product name:

RCS Woven Glass Fabric Soft Mesh

Description:

A fibreglass soft mesh used for reinforcing plaster.

Typical Use:

- Installed within the base coat of plaster
- Generally used for wrapping corners
- Lap of 100mm

Technical Data:

Finished Weight:	160 g/m ² (+/- 5 g/m ²)
Colour:	White
Coating:	PCV
Aperture Size:	4mm x 5mm (+/- 0.5mm))
Tensile Strength:	>1500 N/50mm
Alkali Resistance:	>60%
Elongation:	<5%
Roll Width:	100mm, 200mm, 300mm, 500mm, 1000mm
Roll Length:	50 metres
Packaging:	Each roll is wrapped in plastic film.

Note: Alkali Resistance is measured as the ratio of conditioned to unconditioned breaking force after immersion in a 5% solution of sodium hydroxide for 28 days at room temperature.

Environmental and Safety

Ensure that any excess product is disposed off at the appropriate Refuse Stations.
